MRI/Radiologists

Fernwood Community Radiology

- 4/21: I found scheduling multiple types of scans at the same appointment easy to do at the Fernwood Community Radiology branch- it's near enough to NIH to make it easy to go to in non-Covid times....

Medical Park Drive

- I go to the one on Medical Park Drive (off Georgia) and it has been fine. Not great, but not bad enough to leave. I have found the technicians to be good, although the communication is not great. I guess that is not much of an endorsement.

The Society for Breast Imaging

- The Society of Breast Imaging recommends that you schedule your screening mammograms (regular yearly mammograms for patients without symptoms) before your first dose of a COVID-19 vaccination or four to six weeks after the second dose. Wait at least 14 days after your COVID-19 vaccine before getting any other vaccine, including a

flu or shingles vaccine. Or if you have recently received any other vaccine first, wait at least 14 days before getting your COVID-19 vaccine

Washington Radiology (301) 564-1053

- 4/21: I too switched to Washington Radiology and am very happy with them.
- 4/21: I had a great experience at Washington radiology both in friendship heights and in fairfax.
- 4/21: I also switched back to Washington Radiology after having billing and other errors at Community Radiology (e.g., arriving to be told that the mammography machine was broken, returning and it was still broken – and no one ever called me). Usually go to Fernwood Road in Bethesda. It is a pain that parking is not free. My friend has had good experiences also at the Potomac location of Washington Radiology – it is just off of 270, you can park right in front of the building, and parking is free. At both locations, there is a grocery store nearby so you can combine trips.
- 4/21: I second Washington Radiology. I go to the office near Walter Johnson High School. Very efficient and professional.
- 4/21: I stopped using them too [Community Radiology Associates] and now go to Washington radiology in Bethesda.
- 4/21: Always had great results with Washington Radiology in Bethesda.

FOOD

Bakers

Oh La La Bakery

12/20:

- A new bakery opened on Univ Blvd, same side and very close to IHOP. Oh la la. Bakery....2600 Univ Blvd.
- Heard about them from a friend who said they were struggling to stay open. This morning I bought delicious croissants (plain, but they have filled ones), and chicken pot pies that can be frozen. Wonderful looking desserts in the showcase! I asked how business was doing and he was hoping it was going to get better. Said after Thanksgiving they had to discard many of the pastries. I used meter parking right in front of the shop. Once restrictions are over, they have space for a dine in cafe. Also serve lots of coffees, sandwiches etc. Wonderful selection of holiday desserts!
- I just tried this bakery yesterday. Everything I bought (croissants and pastries) was delicious. They also offer sandwiches. I will be back very soon.
- I agree. It's great. I bought the chicken pot pies and desserts and they were delicious!
- Can confirm. Ordered lunch from there this afternoon and it was terrific. Amazing bread. Highly recommended.

Cristina Ristorante Italiano

- 2/21: We go to Cristina Ristorante Italiano typically 2-4 times per month. It's a small personal operation with 2-3 waitresses depending on the day of the week and 3 folks in the kitchen. That's pretty much it. The owner recently died but his wife is keeping the restaurant going. The head waitress has a son at St. Mary's College of Maryland in the same dorm as our son. They are all sweet and have taken quite a hit. More than most, they practice CDC guidelines. I second Peggy's recommendation. And the food is very good. We love Cristina's!

- 1/20: I also recommend David Alarcon. I'm a landscape designer and I use him to install my designs for clients. He always does a great job, is reasonably priced, and very honest. He can think and adjust on his feet if unexpected things come up. He takes great pride in his work and treats his employees very well.

Costanza, Ramon, (RC Masonry), 240-281-5313

- 11/20: We hired Ramon Costanza in November 2020 to repoint our brick walls leading into our basement entryway, since they were beginning to crack along the mortar. We were very pleased with the quality of his work, his professionalism, and found his pricing to be reasonable. In addition to brick work, he also repairs chimneys/caps.

- 10/20: Based on isca recommendations we had come out for a smallish project. Dug up an area between our porch and garage. Re-graded and put down gravel and stones. Very responsive from the get go. Came out and went through what he thought should be done. Very reasonable quote for the job. Cranked it out in half a day and did a beautiful job. Highly recommend if you need heavy landscaping or masonry type work done. He's already going to look at job at a friends house.

Estimates are free.

J&G Landscape Design, 301-476-7600

- 5/20: In March and April we used J&G Landscaping owned and operated by Jeff and Greg Potter to re-do our front yard. We choose them because we wanted to improve the soil in our yard while having the landscaping completely redone in our front yard and on the sides of our house. They dug up our entire front yard, put down new higher quality drainage pipes, made new beds, installed irrigation, planted new plants, put down hard wood mulch, used preen weed preventer on all of the beds, and put down sod. They also do hardscaping so we had them tear down and rebuild our front steps and porch. I can't recommend them enough. They have been very easy to work with, their team has done great work, and they continue to answer all of our questions for how to take care of our new plants and lawn. They just came out this week to check on the new plants and will be replacing some that haven't made it through all of the late frosts. They will be coming back later this year to build a portico over our front door.
- 6/19: Regraded my lawn, re-parged my foundation, fixed the downspouts. Also do design.

- 2/19: We worked w/ Matt to design a rain garden. He helped with MoCo's requirements.

- 8/19: The years keep showing poor results from their work - both design and installation.
- 7/16: I was very disappointed.
- 7/16: We realized much later that some small trees shouldn't be where they put them.
- 7/16: [Rec for landscape architects.] We used them & we're very satisfied.

- 3/21: We absolutely love our gardener! He's built and dug out beds for us, laid mulch, taken down trees, cleaned gutters, repaired our fencing, and does our regular lawn maintenance. He also does our snow removal on the rare occasion we get it. I cannot recommend Omar and his team highly enough and we'd love to see others in the neighborhood use him. Tell him that Patricia (my partner) on Garwood Street sent you.

Power Washer

William Palmer, 301-915-5200

- 4/20: He did a phenomenal job for us on a large patio that never sees a ray of sun and was nearly black after all those years of shade. It's barely recognizable now! He also did two porches and the siding on our sunroom. All look look great and not a speck of damage to any of the many plants that are in range. He's a young man easy to work with and very conscientious about his work. Highly recommend him.

Tree Care

Adirondack Tree Experts, 301-595-2827

- 9/20: I could not be happier. The price was one of the best quoted, out of eight estimates that I got. And the work was absolutely exceptional. All my neighbors sat and watched the Artistry of them removing this tree seemingly effortlessly, and all of them agreed with me that it was just about the best they had ever seen.
- 5/20: Adirondack we've used on several occasions, and our next door neighbor loves them as well. The owner himself even swung by when we were worried about the health of our tree and his foreman was called away to a more pressing appointment.
- 10/19: removed two dead Japanese maple trees from our front yard in summer 2019 and we will be having them come back to remove a dying magnolia tree. They were very responsive to my email, and they sent out a certified Arborist who evaluated our trees and explained how old they were and why they had died. The work was performed by a team that was professional and efficient, who were very careful not to damage any of the bushes or other trees in our yard. They ground up the stumps, filled in the holes with dirt, and chopped up the larger pieces of wood into firewood for us.
- 8/19: Their arborist & owner are certified tree assessors & their guys do a great job.
- 6/18: Also good.

- 8/16: [No comment added]

Bartlett Tree Experts (Kevin Carr, Mgr), 301-881-8550

- 5/20: We had great experiences with Bartlett Tree Experts & Alfaros Tree Experts. I recall that Alfaros gave us a 10% discount due to our being first-time customers.
- 10/19: Bartlett is terrific. We have a White Oak and called them to make sure we weren't affected by the recent spate of ambrosia beetle infestations. Thankfully we weren't affected but the tree was stressed and they offered some preventive care. I found the cost inexpensive for the hopeful boost it will provide the tree.
- 9/19: Saved our oak from chestnut borer, have Ph.D entomologists & excellent arborists.
- 6/18: They were very professional.
- 8/16: [No comment added]

Branches Tree Experts, 301-589-6181

- 10/19: Branches has certified arborists, and have done an excellent, thoughtful job pruning back our trees. (Interestingly, they often rope up into the trees rather than using lifts. We can vouch for both recent work by them -- and the long term health (and beauty) of trees they trimmed for us several years ago. They aren't the cheapest tree service, but I trust their work and recommend them.
- 8/16: [No comment added]

One worked for Barlett Tree and completed his arborist training and certification in record time. They live in Woodmoor.

SavATree, 301-545-1712

- 11/19: They scheduled the job quickly and arrived bright and early on the day. They were friendly and efficient. Sara arrived with the crew to review the work. They cleaned up and were good about keeping the gates closed for the dogs.
- 6/18: We work with SavATree. They offer many well-qualified specialists.
- 8/16: They removed 5 trees. Good price & work, including grinding stumps & clean-up.
- 8/16: The arborist was a delight. Work was great! They stacked the saved wood.

Takoma Tree Experts, 301-681-5800

- 5/20: Takoma TE did a phenomenal job on moving the third trunk of our tri-trunk giant sycamore (one of oldest in counties)—and on a short emergency bc the trunk was cracked.
- 9/19: Took a large tree out of my backyard. They were less expensive and did a nice job.
- 8/16: We have used them multiple times & been very happy with their work and price.

Walt's Tree Service, 301-933-0752, 240-533-1044 (cell)

- 9/19: Took out a large, dead tree, did a great job and cost 30% less than other quotes.

- 6/20: I just had a great experience with YA Landscaping! They did tree work, shrub pruning, weeding, and moving plants around, just as I asked, with some good suggestions as well. The price was so reasonable, and they were incredibly pleasant to work with. I will definitely call on them again!
- 6/20: We also had a great experience with YA Landscaping. We had flower beds created, pruning, weeding, tree trimming etc...
- 6/20: We had them come out last week dig up the two front beds removed the vinca and grasses and planted roses and put down sod. Great job all done in a day
- 6/20: We also had YA Landscaping do work for us. Very reasonable prices and very friendly owner and staff.
- 5/20: I also highly recommend YA's Landscaping (see below). Yovanni is a pleasure to work with and they did a great job removing a large tree and many very large branches from a few more trees. Good cleanup. Good prices too.
- 10/19: They showed up promptly at 7:30 with an expert crew and just finished at 3pm and did a splendid job, including moving a couple of plants out of the way of their work and grinding the stump. Yovanni Argueta is a pleasure to deal with and a couple of his brothers are part of the crew. The company also does landscaping and general yard maintenance.
- 9/19: Took down large maple. Great job, reasonably priced. Protected nearby perennials.

Click Construction

- 10/19: handled repairing the floor in one of our ground floor bedrooms in 2018 that had sagged and pulled away from the wall, leaving a 1-2 inch gap between the floor and wall that stretched 3-4 feet. We had discovered that the room was not on the foundation, it was over floor boards that had rotted because water was pooling under the room. So it was clear that the project would involve pulling up the floor around the gap, probably replacing the joists under the floor, and then putting down new flooring. To help stop this problem from happening again, we needed some gutter work done on the outside of the house, and waterproofing done in the basement including getting new basement windows. We contacted them and the owner, Alan, came out to view our issue. He told us what his team would do, making it clear that the project may change depending on what was found when they pulled up the floor, but he made it clear that his team could handle whatever we needed to have done. In the end the project expanded because we decided to have his team stain and refinish all of the flooring in the room, and paint the entire room (including the ceiling and closet). We also had them install insulation under the room after they put in new joists. They also re-did the gutter on the outside of the house to move water to our front yard and away from the room, they put in new windows in the basement and painted dry lock along the basement wall that was affected by the dampness. Alan and his team were very professional and easy to work

with. Alan was easy to reach, he responded to texts very quickly and made sure we knew what work was going to be done and what it would cost. His team did not do anything until he talked with us and confirmed what we wanted done. His teams are made up of master carpenters, excellent painters, and general contractors so they can handle any kind of home repair. The work was very high quality. The team cleaned up all of their work at the end of each day and they even moved the furniture back into the room when they were done. The repaired room is now the nicest room in our house. We'll definitely be going back to them for future home repair and home remodeling projects and we've already recommended them to several of our neighbors.

- 11/19: Yi is the best!
- 11/19: Very knowledgeable and professional. We've used him a few times.
- 10/19: handled our electric repairs in 2018. We have an older home and after noticing that several of the outlets in our house were loose and having one spark, we decided to have a variety of electrical work done in our home. The work included having a loose wire capped off in the basement, the electrical box replaced and relocated for our new washer and dryer, and all of our existing 2 prong outlets throughout our home updated to 3 prong outlets. It was easy to contact them thru email and text. The owner was very responsive. He came out and viewed our issues, told us exactly what needed to be done, and let us know that updating our outlets would not require any rewiring so we actually needed to have less work done than we had expected. His team came out and within 3-4 hours they had completed all the work. They even came back the next day to fix one of the outlets that wasn't working - which was no fault of theirs. We had accidentally turned off the power to the outlet after they had left and they showed us how to turn it back on. They even provided us advice on types of ceiling lighting we could have installed in our living room.

Lyons Plumbing, 301-253-4090

- 5/20: We've been using Lyons Plumbing. I think it's a two-man operation at this point - Dan Lyons is the owner and a man named Mark usually makes the house calls. Tim Whistler Plumbing & Gas Fitting, 301-648-9676

- 7/20: We used Tim Whistler to convert our fireplace to gas. We had a complicated install (and a very particular husband). Tim was great. Very knowledgeable and professional. Likely not the cheapest but I think I'll economize elsewhere than that! We wish we'd done it years ago!!!!
- 10/19: [no comment given]
- 10/19: replaced our old water heater with a new one in January 2019. Our 22 year old hot water heater was slowly dying, our showers were getting colder, and we could no longer take baths because we didn't have enough hot water to fill the tub. Three days before Christmas I submitted a message on the Tim Whistler website asking for an estimate. I didn't think I'd hear anything back until after the holiday, but to my surprise Tim responded to my message that day, and on Christmas Eve he came out to our house to look at our water heater and provide us details on his services. We had contacted other companies but Tim was the most responsive and helpful. So on January 21, 2019 Tim's team came out to install a new 50 gallon water, with a 5 gallon expansion tank. They arrived early and were very professional and efficient. By noon we had lots of hot water flowing through our pipes. Tim's company applied for the permit and coordinated the WSSC inspection. Not only does his company provide great service, they are the most responsive company I have ever worked with. They send emails and text messages to confirm appointments, they send estimates and invoices on the same day that they provide service, and they follow up. A great company all around!
- 10/18: A great plumber. He has done a lot for me, including heating our pool.
- 1/18: Thorough, reasonably priced, & communicates well about what he's doing why.

Marshall's Roofing & Guttering, Brookeville, 301-946-4545

- 1/21: I have recommended them many times whenever I see someone on the listserv ask about roofers because they are not only reasonable in their prices, but they won't recommend replacing your roof unless it needs it. Several of our near neighbors have used them and were extremely satisfied. I always recommend that people get an estimate from them, and would appreciate it if the next time you're in the Services List, you change their phone number. PHI Group/Paramount

- The PHI Group in Capitol Heights, MD (they also go by Paramount LLC) is the group who repaired the broken water line btwn the meter and our house. They were HORRIBLE -- so bad that the insurance company that referred them to us even issued us a "relationship repair" check! They simply forgot about our first appointment, when they did come, they pulled the WSSC meter completely off when they dug up our front yard causing water to gush down the street for several hours. Their work didn't pass WSSC inspection because they didn't place dirt or filling under the replaced portion of the pipe to support it, and when they filled the hole they didn't properly support our sump pump line so the weight of the dirt broke it and water was being basically routed back to our house/basement for 5 days until they fixed that. And then when they filled everything up, they didn't correctly level our yard or replace the flower bed (which was part of the deal), or straighten the fence btwn our yard and neighbor's so now it is leaning at an absurd angle and has to be dug up to be fixed. And when I needed paperwork from them to get WSSC to write off our \$17,000+ water bill, they didn't send complete documentation after several requests. It took our insurance company to get involved before they would send the correct documentation. There's more, that's just the stuff that comes to mind first :)

Suburban Solutions

- 10/19: moved me out of my apartment back in 2016 and they were great, so when my husband and I needed to have a bunch of material hauled out of our basement in 2018 they were the first company I called. It was easy to contact them thru their email address on their website. One of the owners of the company responded to me within 24 hours and scheduled the date and time when their team would arrive. We had 6 large trash bags and 3 boxes full of material to be donated. We also had several old mattresses, broken furniture, old pieces of wood, metal, and floor tiles that we had inherited from the previous owners, and a solid concrete utility sink that needed to be hauled away. We were nervous about the utility sink because it was incredibly heavy, but the team from Solutions were amazing! The 3 person team arrived on time and within half an hour they had removed all of our items. They handled the concrete sink by strapping it to their moving cart and then they slowly and carefully pulled and pushed it up our basement steps and out our front door. Their prices are reasonable, their team is always on time, and all of their staff are efficient, professional and very easy to work with. This is a company that we will be using whenever we have moving needs or need items removed for donation or for trash, and we'll continue to recommend them to friends and family.

Computers

Apple - Montgomery Mall

- 6/21: My personal opinion is you can't beat the Apple Store, and the one in Montgomery Mall is very convenient (15 minutes or less drive, plenty free parking), they take reservations, they're very honest, and everyone there is very smart. As to cost comparison, my sense is you get a better deal at the store, but I can't say for sure. They will take your current computer as trade-in, as long as it's working, so it's worth considering trading for a new one before it dies completely, and we were advised that at about six years, that's the time to do it. We bought a Mac in 2015, it started acting real flaky (slow); as it was six years old, we bought a new one and traded in the old one for \$275. The new machine comes with an app that lets you copy the complete contents of the old, virtually at the push of a button, and the process then completes on its own in about an hour. Or you can have them do it for you (free) at the store. You could make a reservation for an on-site consultation (free), and get their advice on what to do.

Furniture

All American Mattress 2165 Defense Highway Crofton, MD 410-451-9006

- 10:17: Just a note to thank Marian on Normandy for letting ISCA know about her brother-in-law, Kevin Lally, who sells mattresses in Crofton (message from October below). It so happened that we had ordered a new bed and needed a mattress, and were extremely confused and unhappy with the sales people we had encountered. It was well worth the trip to Crofton, which took about 25 minutes. Kevin has such a thorough knowledge of all the brands he is an authorized seller for, and he let us decide on which mattress best suited our needs --- with no pressure, or undue sales pitch. He was very professional. The entire experience was pleasant, AND he gave us a terrific price on a new king size mattress. Of course, delivery to our neighborhood was free as well. I can't say enough about how worthwhile it was, going to Kevin's store and buying our mattress from him. Thank you again, Marian! Be sure and check All American Mattress out if you are looking to buy a mattress.
